or Call 877.977.3135

Orders must be placed by April 20th

WHY A RAIN BARREL?

Have you ever wondered how much water runs off your roof?

During a typical moderate storm, over 700 gallons of water will run off the average 1200 sq.ft roof.

That same roof will shed over 4,000 gallons of water from April to August.

YOUR PLANTS WILL LOVE IT!

Rain water has no added chemicals. Collect the soft rain water your plants crave.

Ready for your gardening needs, this rain barrel replenishes its water supply every time it rains.
